### Approval of Minutes

No preceding meeting.

### Introduction

AO welcomed everyone to the meeting. He expressed regret that MD was not able to participate in the meeting. Dr Kim An (Deputy of chief technical of NPH) stepped in the meeting room to greet everyone before we started the meeting. LS and PN introduced themselves and expressed gratitude

for the opportunity to provide introduction and training on the cDMAT and CB-DMAT. LS began meeting with presentation and agenda (attached). Attached slides were handed out to all attendees.

### **History of cDMAT**

LS presented briefly the history of the cDMAT (see slides). PN provided additional information. LS stressed the importance of the cDMAT longevity (almost 13 years to create the cDMAT). SK volunteered information on the DoBrain Project and that the main reason the project did not use the cDMAT because of the bad timing. DoBrain will consider cDMAT in the future.

### **Introduction of cDMAT/CB-DAMT and training**

PN talked about the experiences AHC has working with the cDMAT and provided further detail on the full cDMAT and CB-DMAT. CB-DMAT will soon be implemented at AHC starting May 2019 where the nurses can use to screen for possible delay. PN proceeded with the training by providing examples and allowing times for questions. The participants expressed understanding after the training.

LS announced that the Khmer version of both tools will soon be available, although no specific dates were given. LS demonstrated the cDMAT website. The link is <https://cdmatgroup.wixsite.com/cdmat>. All final version of the tools and other documentation can be found on the website.

### **New member in cDMAT Core Group from NPH**

LS and PN expressed desire to recruit new members (preferably 2) from NPH to join the cDMAT Core Group. All participants agreed it would be a great idea for a representative to join the group and it was expressed that SK would likely be the person to join from NPH. SK will consult among his group and get back to AHC.

### **Taking ownership of cDMAT/CB-DMAT**

LS and PN expressed the importance of NPH taking ownership of the cDMAT and CB-DMAT. Participants from NPH agreed and expressed desire to help push the two tools for national dissemination.

### **National dissemination - MoH**

All participants recognized the challenges of getting the cDMAT/CB-DMAT recognized by the MoH. All agreed that it would be an easier path if NPH would take the lead with support of AHC. OV expressed the importance of piloting the tools at NPH first so that we can gather data on the feasibility (usage) before presenting it to the MoH. Other strategizes included presenting the tool at national conferences and providing workshops.

### **Actions**

- KS to get back to AHC with person(s) joining the cDMAT Core Group
- KS to get back to AHC regarding input from NPH directors
- LS to update the website and inform all members when updated

### **Next Meeting**

April 2020 (unconfirmed)
